

Education

College/University:

1994-1999 Bachelor of Medicine Univ. in Xi'an

1999-2001 Master of Medicine Univ. in Xi'an

Highest degree

M.B., M.Sc. in Medicine

Major subject

Pulmonary Transplantation Immunology

Project /Research

2003 - Suppression of MHC-Class II molecule up regulation by HMG-CoA reductase inhibitors in an allogeneic model of rat lung transplantation

2002 - Tissue engineered carotids: immunological, histological and molecular characteristics

Scientific Interests and Goals

Every aspect concerning the lung

Lung Transplantation & Transplant Immunology

Lung Preservation & Ischemia reperfusion injury

Pulmonary Stem cell & Tissue Engineering

Thoracic & Experiment Surgery

Hobbies and other interests

I have many hobbies, please visit my personal website, or leave message on my BBS.
