

## **Education**

### **College/University:**

2004-2005: University Kiel, Germany, Institute of Pathology, Clinical Training (PJ).

2003-2004: Howard Hughes Medical Institute, Cleveland, U.S.A., Research Scholar in Cancer Genetics.

2000-2003: University Kiel, Graduate Student in Medicine.

1998-2000: University Halle, Germany, Undergraduate Student in Medicine.

### **Highest degree:**

M.D

### **Major Subjects:**

Medicine

### **Projects/Research:**

Isolation of characterization of clonogenic breast cancer cells

### **Awards & Scholarships:**

2003: Scholarship of the German Academic Exchange Service.

2002: Abraham-Buschke-Award of the Charité Berlin.

2001: Scholarship of the „Studienstiftung“.

1995: Jugend-Forscht-Award in chemistry.

### **Scientific Interests and Goals:**

Yo Berra, an American baseball star of the 1950ties, once said: “What gets us into trouble is not what we don‘t know. It’s what we know for sure that just ain‘t so.“ In my opinion, this pertains to science, too. Hence, it is my goal, that our research on epithelial malignancies truly tackles the nature of cancer.

### **Hobbies and other interests:**

Soccer, funk music and cross country skiing.

### **Publications**

From previous work

**First name:**

**Matthias**
