

**First name:**

**Sumadi-Lukman**

**Last name:**

**Anwar**

**Date of birth:**

**02.09.1980**

**Country:**

**Indonesia**

**E-mail:**

**sumadi.anwar@stud.mh-hannover.de**

**Supervisor:**

**Prof. Ulrich Lehmann  
Institute of Pathology**

## **Education**

### **College/University:**

1999-2005 Universitas Gadjah Mada, Medical Doctor.

2007-2009 Vrije Universiteit Amsterdam, M.Sc in Oncology.

### **Highest degree:**

M.Sc. in Oncology

### **Major Subjects:**

Oncology

### **Projects/Research:**

Profiling of human cancers based on the epigenetic signatures.

### **Scholarships:**

1. Fellowship programme in Oncology at the VU Medisch Centrum, Amsterdam organized by the Indonesian and Dutch Cancer Society, 2006.

2. Huygens Scholarship Programme awarded by Nuffic-Nederland organization for international cooperation in higher education, 2007-2009.

### **Scientific Interests and Goals:**

My field of interest is in Oncology. The development of cancers is initiated by a multistep process involving genetic and epigenetic changes. Epigenetic events occur very early in carcinogenesis processes and also drive progression of tumors. Identification of molecular defects causing by epigenetic aberrations will bring into new standpoint of alternative diagnostic, prognostic, and predictive markers and potential therapeutic entities in cancers.

### **Hobbies and other interests:**

Photography, traveling, and music.
